

MAITHREYAN D

Software Development Associate | Mobile & Full-Stack Developer (Flutter)

Vellore, Tamil Nadu, India | maithreyan2006@gmail.com

[Portfolio](#) | [LinkedIn](#) | [GitHub](#)

SUMMARY

Software Development Associate with hands-on experience building and shipping production Android, iOS, and web applications using Flutter, Dart, React.js, and Node.js. Published a commercial Flutter e-commerce application to the Google Play Store with secure authentication, real-time database sync, and an admin dashboard. Applied state management, REST API integration, and Firebase and Supabase backend services across five shipped products, including a national symposium portal serving paid registrations and an event automation platform delivering credentials to hundreds of recipients. Expected to graduate with a B.Tech in Information Technology in 2027.

SKILLS

Mobile Development: Flutter, Dart, Android SDK, iOS Development, State Management, Google Play Store Publishing, Responsive UI

Programming Languages: Dart, Java, JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3

Backend and Cloud: Node.js, Express.js, REST API, JWT Authentication, Firebase (Authentication, Firestore, Realtime Database), Supabase, Vercel

Databases: Firebase Firestore, Firebase Realtime Database, MongoDB, PostgreSQL, MySQL

Frontend and Web: React.js, Next.js, Vite, Tailwind CSS, Material UI, Framer Motion

Tools and Design: Android Studio, Xcode, VS Code, Git, GitHub, Postman, Figma, Razorpay Integration

Professional Strengths: Clear communication, teamwork and cross-functional collaboration, ownership and accountability, customer-focused problem solving, adaptability in fast-paced environments

WORK EXPERIENCE

Software Development Associate | PIAX Life Private Limited | Walajapet, Tamil Nadu | 08/2026 - Present

- Maintain and extend PIAX digital products across 3 surfaces (web, mobile, and internal platforms) as the sole developer reporting directly to the Founder and CEO.
- Deploy frontend and backend features to production across 3 product surfaces, integrating REST APIs, databases, and third-party services into live customer-facing systems.
- Coordinate with UI/UX, Product, and Operations teams across 4 stages of delivery (design, testing, deployment, and ongoing maintenance) to release software products.
- Diagnose and resolve production issues, measurably improving application performance, functionality, security, and user experience.
- Own assigned projects end to end, delivering within agreed timelines and maintaining technical documentation for all development work.

Web Development Intern | InAmigos Foundation | Remote | 05/2026 - 06/2026

- Developed high-performance responsive web user interfaces using React.js, HTML5, and modern CSS3.
- Implemented cross-browser optimizations, component state management patterns, and interactive modal dialog systems.

PROJECTS

Mugundhan Textile E-Commerce Mobile App | Flutter, Dart, Firebase, Supabase.

- Architected and published a full-featured commercial mobile e-commerce application live on the Google Play Store.
- Engineered an end-to-end shopping experience including secure user authentication, dynamic catalog browsing, interactive cart, wishlist, and real-time order lifecycle tracking.
- Integrated Firebase and Supabase backends for cloud database management, real-time inventory updates, and multi-platform synchronization.
- Built an integrated administrative dashboard for product catalog control and order management workflows.

INFogram'26 Technical Symposium Platform | React.js, Node.js, Razorpay, Firebase.

- Engineered a national technical symposium web platform handling attendee registrations and organizer admin workflows.
- Integrated the Razorpay payment gateway and automated digital QR-code pass generation for on-site mobile entry scanning.
- Link: [Live Site](#)

Tech Nexus Event Pass and Certificate Automation Platform | React.js, TypeScript, Vite, Tailwind CSS.

- Built a community event automation platform that generates and delivers personalized event passes and certificates in bulk, developed collaboratively with the Tech Nexus Community.
- Implemented a template design workflow with Excel list upload, automatically mapping attendee names and email addresses onto generated passes and certificates.
- Automated group email distribution, dispatching personalized passes and certificates to hundreds of recipients in a single run and eliminating manual sending.
- Delivered a responsive web interface covering template configuration, recipient list management, bulk generation, and delivery tracking.

Sentiment Analysis Platform | Python, NLP, Web Application.

- Developed an AI-powered sentiment analysis platform with real-time NLP scoring and visual analysis output.
- Implemented interactive analysis workflows for identifying sentiment and presenting analytical results.
- Link: [Live Site](#)

Fake News Detection Engine | Python, Machine Learning, React.js.

- Developed an AI-based news authenticity detection engine evaluating headline claims and textual patterns.
- Integrated Python NLP routines to analyze linguistic credibility indicators through an interactive web application.
