PROFESSIONAL SUMMARY

Mobile Application Engineer and Founder of Appziio with hands-on expertise architecting, developing, and deploying production Android and iOS applications using Flutter and Dart. Track record of shipping commercial mobile software directly to the Google Play Store with secure cloud sync, real-time databases, and responsive UI/UX. Experienced in mobile architectural patterns, state management, RESTful API integration, Firebase/Supabase backend services, and complementary full-stack web engineering.

TECHNICAL SKILLS

Mobile Engineering	Flutter, Dart, Android SDK, iOS Development, State Management, Play Store Publishing, Responsive UI
Programming Languages	Dart, Java, JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3
Backend & Mobile Cloud	Firebase (Auth, Firestore, Realtime DB), Supabase, Node.js, Express.js, REST APIs, JWT Auth
Databases	Firebase Firestore, Firebase Realtime DB, MongoDB, PostgreSQL, SQL
Mobile Tooling & Design	Android Studio, Xcode, VS Code, Git, GitHub, Postman, Figma (UI/UX), Vercel
Frontend & Web Technologies	React.js, Next.js, Tailwind CSS, Material UI, Framer Motion

PROFESSIONAL EXPERIENCE

Appziio July 2026 – Present
Founder & Lead Mobile / Software Engineer Remote

- Architected and shipped production cross-platform mobile apps and custom full-stack software systems for client businesses.
- Engineered commercial Flutter mobile e-commerce application from inception to Google Play Store production release.
- Built robust backend RESTful APIs using Node.js/Express with secure JWT authentication and real-time database synchronization.
- Automated mobile release delivery pipelines and managed cloud infrastructure deployments across Firebase and Vercel.
- Designed mobile-first UI/UX design systems and design components utilizing Figma, Framer Motion, and Tailwind CSS.

InAmigos Foundation May 2026 – June 2026
Web Development Intern Remote

- Developed high-performance responsive web user interfaces utilizing React.js, HTML5, and modern CSS3.
- Implemented cross-browser optimizations, component state management patterns, and interactive modal dialog systems.

FEATURED MOBILE & ENGINEERING PROJECTS

Mugundhan Textile E-Commerce Mobile App Flagship Mobile Release
| Flutter, Dart, Firebase, Supabase, Google Play Store

- Architected and published a full-featured commercial mobile e-commerce application live on the Google Play Store.
- Engineered end-to-end mobile shopping experience: secure user authentication, dynamic catalog browsing, interactive cart, wishlist, and real-time order lifecycle tracking.
- Integrated Firebase and Supabase backends for cloud database management, real-time inventory updates, and multi-platform sync.
- Built integrated administrative dashboard for dynamic product catalog control and order management workflows.

[Google Play Store](#) | [Live Web Demo](#)

INFogram'26 Technical Symposium Platform National Portal
| React.js, Node.js, Razorpay, Firebase, QR Workflows

- Engineered national technical symposium web platform handling attendee registrations and organizer admin workflows.
- Integrated Razorpay payment gateway and automated digital QR-code pass generation for mobile on-site entry scanning.

[INFogram'26 Technical Symposium Platform](#)

Sentiment Analysis AI / NLP
| AI, NLP, Web Application

- Developed an AI-powered sentiment analysis platform with real-time NLP scoring and visual analysis capabilities.
- Implemented interactive analysis workflows for identifying sentiment and presenting analytical results.

[Sentiment Analysis](#)

Fake News Detection Engine AI / Machine Learning
| Python NLP, Machine Learning, React.js

- Developed an AI-based news authenticity detection engine evaluating headline claims and textual patterns.
- Integrated Python NLP routines to analyze linguistic credibility indicators through an interactive web application.

PORTFOLIO PROJECT

Maithreyan.in – Developer Portfolio

Personal Portfolio

Responsive Web, Interactive UI/UX

- Developed a professional developer portfolio showcasing projects, technical skills, experience, certifications, and engineering work.
- Implemented responsive layouts, interactive navigation, project presentation, and modern UI/UX.

EDUCATION

C. Abdul Hakeem College of Engineering & Technology (CAHCET)

2023 – 2027 (Expected)

Bachelor of Technology (B.Tech) in Information Technology – Anna University

Vellore, Tamil Nadu

CERTIFICATIONS & ACHIEVEMENTS

- Google Play Store Publisher: Successfully published production commercial Flutter e-commerce app to Google Play Store.
- TCS iON Career Edge – Young Professional: Tata Consultancy Services (Cert ID: 119854-26810271-1016)
- Career Essentials in Generative AI: Microsoft and LinkedIn Learning (Cert ID: 2c1847e237fe957c960e4bbfe1cbe4dc8cbfa28bab6fa079152dbc)
- UI/UX Design Career Workshop Certificate: GUVI Geek Network | HCL (Cert ID: 0il6R37E9785g1Gn0Z)
- Web Development Internship Certificate: InAmigos Foundation (Regd: U85300CT2020NPL010641)
